

# Project-II

Patel Shahil Manishbhai: 200010039  
Pranav Digamber Talegaonkar: 200010041

30th October 2022

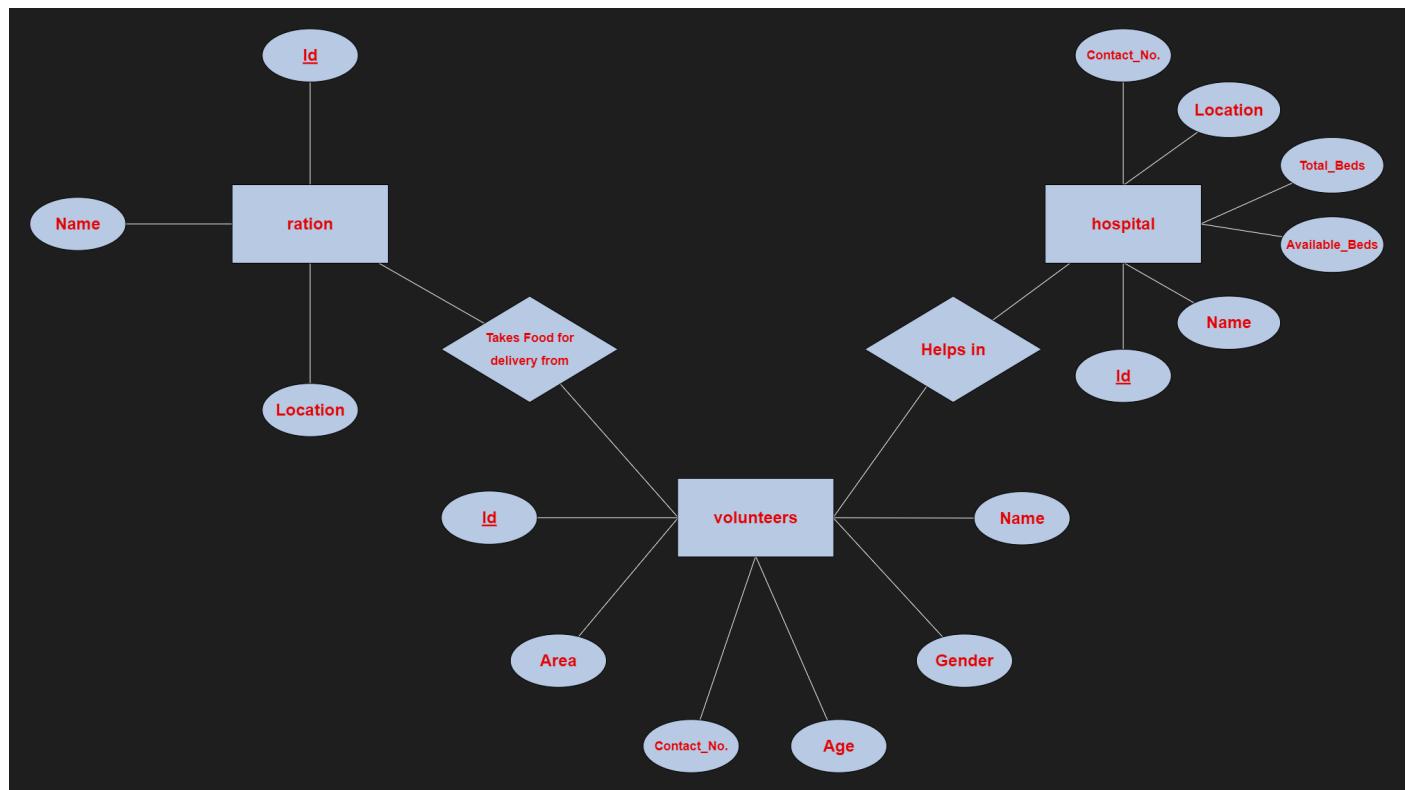

## 1 Overview of the Project

Our Project **Disaster-Management-System** is built to help people getting access to *Hospitals, food, Volunteer* and Emergency Contact no. in a particular region. In this project we have focused on making the information for ‘total beds’ and ‘available beds’ in a particular hospital be available to the victim of Disaster, so that the time of the patient/victim is saved. He/She can directly go to the hospital which has empty bed, instead of searching for beds in every hospitals. The information of Ration centres is also available which is very useful to get food supplies during any disaster. People can also register themselves as volunteers to help others during the disaster, also people can contact volunteers to get help.  
The admin can add, edit, delete the details of hospitals and ration centres.

## 2 Database Schema

### 3 E-R Model

We came up with the following E-R model for our Disaster Management System.

A brief explanation of each entity is as follows:

## 4 Views and Users

Our system has two views, one for a site visiting user which can see the list of hospitals, ration centre, volunteers and their details.

A user can also register his/herself as a volunteer to provide service during pandemic.

Another view is for Admin who can add, edit delete the details of Hospitals, ration centre. Hence, our system has two kind of users, one is Admin and the other are the people who wants the service during disasters.

### Hospital

The *hospital* entity has the hospitals which are registered on the system and are operational during the disaster. The attributes of the hospitals include *Id*, *Name*, *Available\_Beds*, *Total\_Beds*, *Location*, *Contact\_No..*. The victims of Disasters can thus watch out for the hospitals which has available beds and books a bed for their treatment in that hospital via contact\_no or directly visiting the hospital using the given location.

### Ration

The *ration* entity has details of the shops, centres from where food resources are distributed during the Disaster, the attributes of the ration includes *Id*, *Name*, *Location*. People can go to the ration shops, centres for food during Disasters.

### Volunteers

The *volunteers* entity has attributes such as *Id*, *Area*, *Contact\_no..*, *Age*, *Gender*, *Name* of the volunteers. People who need help can contact the volunteers, also people who want to help others can get themselves registered as volunteers.

## 5 Integrity Constraints

1. For the entity set **hospital**, the primary key is *Id*, hence the Id attribute will distinguish two hospitals.
2. For the entity set **ration**, the primary key is *Id*, hence this attribute will differentiate two entities in the ration table.
3. For the entity set **volunteer**, the primary key is *Id*, hence the Id attribute will distinguish two voluteers in the entity set.

## 6 Relational Database Design

### Hospital:

```
create table hospital(
Id numeric(5,0) NOT NULL,
Name varchar(50),
Available_Beds numeric(5,0),
Total_Beds numeric(5,0),
Location varchar(200),
Contact_No numeric(10,0),
Primary Key (Id)
);
```

### Ration:

```
create table ration(
Id numeric(5,0) NOT NULL,
Name varchar(50),
Location varchar(200),
Primary Key (Id)
);
```

### Volunteer

```
create table volunteer(
Id numeric(5,0) NOT NULL,
Name varchar(50),
```

```
Age numeric(2,0) check (Age > 18),  
Gender varchar(10),  
Contact_No varchar(20),  
Area varchar(50),  
Primary Key (Id)  
);
```

## 7 Languages and Technologies used

We have used the following technologies:

1. Java
2. JDBC
3. J2EE
4. MySQL
5. CSS
6. Bootstrap
7. HTML
8. Apache Tomcat Server

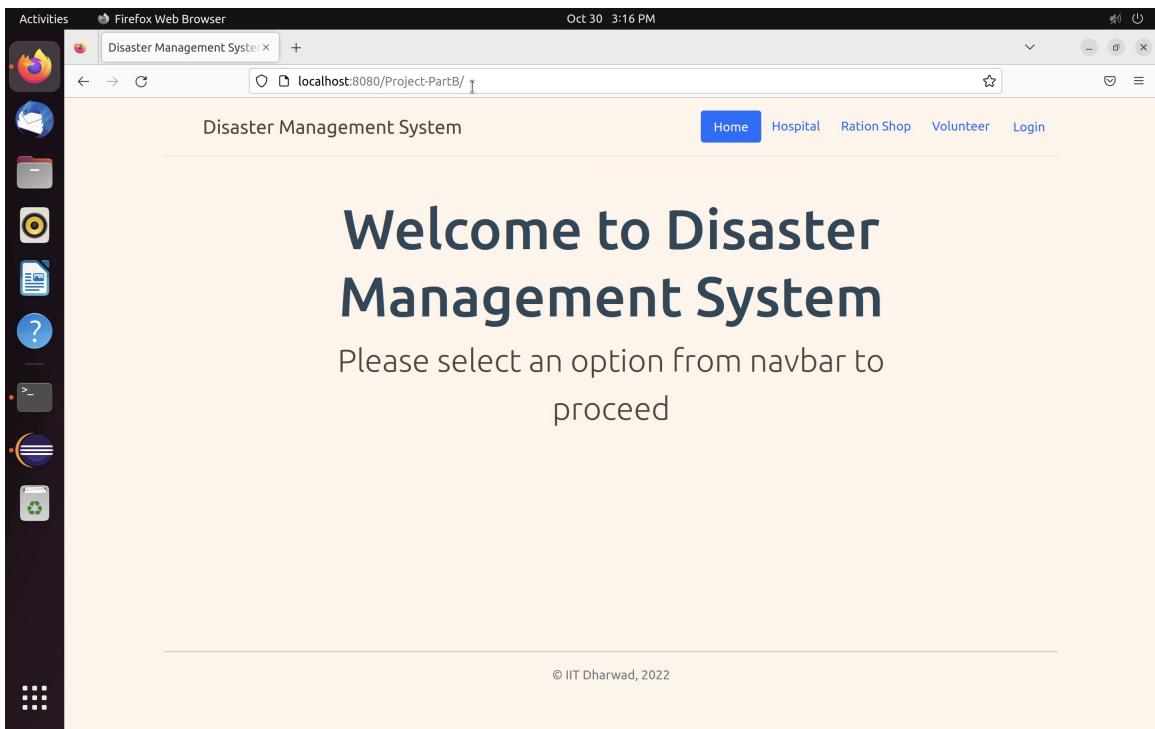

## 8 Interface Designs

We have used Bootstrap for creating the Navigation bar, which is used for Navigating between various pages, also the admin has to click on the **Login** button in the Navigation bar to login as an Admin and add the Hospitals, Ration centres in the database.

Whereas the users can Navigate between the Hospital and Ration Pages to see the information regarding the registered Hospitals and Ration centres on our Disaster Management System.

## 9 Workflow and Pages

**Homepage** This is the first page that a user sees when he/she visits the website. The Navigation bar has option. All this functionalities are present in *Home.jsp* file.

**Hospital** This page gives the list of Hospitals that are registered on our system, this view is available to every user that open the site, It also has certain information regarding every hospital.

The screenshot shows a Firefox browser window titled "Disaster Management System" running on localhost:8080/Project-PartB/DisplayHospital. The browser interface includes a toolbar with icons for search, refresh, and navigation, and a status bar showing "Oct 30 3:16 PM". The main content area displays a table titled "Hospitals" with the following data:

ID	Hospital Name	Available Beds	Total Beds	Location	Contact No.
1	Spandana Hospital	55	120	41/2, Road, UB Hills, Saptapur, Dharwad, Karnataka 580008	8362771191
2	Shravya Hospital	69	150	Sadhankeri Road, near Government Printing Press, Dharwad, Karnataka 580008	8362443620
3	Shreya Hospital	45	130	NH 4 p.b road, opp new civil court, Dharwad, Karnataka 580008	8362443515
4	Bijapur Hospital	15	90	Karwar Rd, Opposite ESI Hospital, Heggeri Colony, Arvind Nagar, Hubballi, Karnataka 580024	8362305459
5	Pandurangi Hospital	25	80	Michigan Compound Ground Rd, Saptapur, Dharwad, Karnataka 580001	8362776158
6	KLE Suchirayu Hospital	30	120	Gokul Road, KRTSC Bus Depot, Kallur Layout, Hubballi, Karnataka 580030	8362239000
7	Vivekananda General Hospital	45	160	Backside Chadda Showroom, Deshpande Nagar, Hubballi, Karnataka 580029	8362251002
8	Central Railway Hospital	78	100	South Western Railways, Gadag Road, Hubballi, Karnataka 580020	8362363472

**Ration Shop** This page gives the list of Ration shops that are registered on our system, this view is available to every user that open the site, It also has certain information regarding every ration shops.

**Ration Shop**

<b>Id</b>	<b>Shop Name</b>	<b>Location</b>
1	J C Nagar Government Office(Ration)	J C Nagar, New Hubli, Hubballi, Karnataka 580020
2	Ration Shop(Vidya Nagar)	Adarsh Nagar, kori, Vidya Nagar, Hubballi, Karnataka 580032
3	Karnataka Government Ration Office	Shop No. 3, Renuka Building, Gurusiddheshwar Nagar, Karnataka 580020
4	G v kudri ration shop	Heggeri Colony, Old Hubli, Hubballi, Karnataka 580030
5	Govt Ration Store	Sarawathpur, Kalaghatgi Road, Dharwad, Karnataka 580004

**Volunteers** This page gives the list of volunteers that are registered on our system, this view is available to every user that open the site, It also allows every user to get themselves register as volunteers if they wish to help others.

**Volunteers**

<b>Id</b>	<b>Name</b>	<b>Age</b>	<b>Gender</b>	<b>Contact No.</b>	<b>Location</b>
1	Joseph	21	Male	7482027528	Belagali
2	John	20	Male	8473259873	Gokul
3	Sam	28	Male	7628548388	Hallihal
4	Bobby	35	Male	6934257788	Hubli Gandhi Nagar
5	Millie	19	Female	9367283675	Hubli Kmc
6	Angela	23	Female	8267423742	Hubli Udyamnagar
7	Alisha	22	Female	7927489339	Katnur
8	Jennifer	25	Female	9346737927	Old Hubli
9	Ariana	21	Female	7947856289	Nulvi
10	William	33	Male	7984372076	Varur

**Volunteer Registration Form** If a person wants him/herself registered as a volunteer he/she can register using this form.

Activities Firefox Web Browser Oct 30 3:37 PM

## 10 Conclusion

The project gave us very good experience working with **J2EE** and gave us a glimpse of what can be created using the frameworks taught to us in this course.

Hands on experience was given with **J2EE, JDBC, Java, MySQL, HTML, CSS, and Apache Tomcat Serve** as well as with using all of these frameworks together to achieve various goals that could prove useful in design various website and software systems.
